Profile

Flutter Mobile Application Developer with over 4+ years of experience delivering cross-platform apps across industries including agriculture, e-commerce, telemedicine, government services, bill payment, artisan service marketplaces, social media, and more. Skilled in offline-first solutions, performance optimization, and creating intuitive user experiences. Adaptable, collaborative, and passionate about building impactful digital products.. Passionate about leveraging technology to create impactful digital solutions, I adapt quickly to new tools, frameworks, and evolving industry trends.

Skills

Tools and Technologies: C++, Dart Programming language, Flutter(Cross-Platform Development), Firebase, Version Control (Git) & GitHub, Linux, API Integration (REST, GraphQL), Google Maps Integration, WebSocket Integration, State Management (Riverpod, Provider), UI/UX Design Implementation, Testing (Unit, Widget, Integration), Bluetooth Thermal Printing integration, Postman (API Testing), Local Database Management(Hive, SQLite, Shared Preference), Performance Optimization, Architecture Patterns(MVC, MVP, MVVM), Continuous Integration/Continuous Deployment (CI/CD), Package Management, Animation and Motion.

Experience

Tractrac Mechanisation Services Limited / Flutter Developer

April 2025 - Present, Hybrid

- Developed and maintained a **Flutter-based mobile app** connecting farmers, tractor owners, Tractrac agents, and mechanisation service providers.
- Implemented **offline farm size measurement** using geospatial mapping tools to enable land assessment without internet access.
- Built **offline-first service booking and tracking features** to support rural users with unreliable connectivity.
- Collaborated with cross-functional teams to design and optimize workflows for **farm service requests and tractor deployment**.

Blending Bytes Technologies / Flutter Developer

October 2023 - May 2025, Remote

- Developed and maintained multiple **Flutter mobile applications** across iOS and Android, including:
 - **Autovendy** (iOS & Android): A car e-commerce platform for listing, browsing, and purchasing vehicles.
 - **Autovendy Dealer** (iOS): Dealer-focused app with advanced features including:
 - **360° car image capture** and **panorama photography** for immersive listings.
 - **In-app camera** with support for **0.5x wide-angle zoom** on compatible devices.
 - **Offline listing mode** allowing dealers to create and save car listings without internet access, with auto-sync when online.
 - **Medik** (Android): A telemedicine platform enabling **online consultations, drug purchases, subscriptions, and lab test bookings**.
 - Implemented **secure payment integrations** and in-app subscriptions for health services and e-commerce transactions.
 - Designed and optimized **API integrations** for booking systems, product listings, and user authentication.
 - Collaborated with UI/UX teams to create intuitive, responsive interfaces that improved user retention.

HNGx/ Flutter Developer

September 2023 - November 2023, Remote

As a self-taught developer with no formal certification, I joined the highly competitive HNGx “survival of the fittest” internship program to test and prove my skills. Out of 22,000+ participants, I emerged as a **finalist in the top 300**. The program’s intense, challenge-based format involved building cross-platform mobile applications under tight deadlines, collaborating with global teams, and solving real-world technical problems, all while showcasing resilience, adaptability, and technical expertise.

Certificate:

 HNG Internship X_Emmanuel Olorunshola_certificate.pdf

Ruban Technology / Flutter Developer

July 2022 - August 2023, Hybrid - Gwarinpa, Abuja

Developed the **Kano State Business Enumeration App**, an enterprise mobile application used by government agents for **enumerating and assessing businesses** across the state.

Implemented in-app workflows for:

- Capturing and validating **business data** during field operations.
- **Automated bill calculation** based on assessment results.
- **Bluetooth thermal printer integration** for on-the-spot printing of payment bills to businesses.

Designed the app to operate **both online and offline**, ensuring uninterrupted field usage with automatic data sync when connected.

Collaborated closely with backend engineers to design **REST API endpoints** for data collection, billing logic, and reporting.

Enhanced **UI/UX** for field agents, focusing on usability and speed in real-world conditions.

Conducted device testing and optimizations for low-end Android devices used by agents in rural areas.

Education

Royal College / SSCE

September 2013 - August 2019, Masaka, Nasarawa State.

Joseph Ayo Babalola University / BSc Computer Science

September 2019 - August 2023, Ikeji-Arakeji, Osun State.
